ANJ Turnkey Projects Private Limited

Biodiversity Commitment Statement

At **ANJ Turnkey Projects Private Limited**, we recognize that biodiversity is essential to the health of ecosystems, the resilience of communities, and the sustainability of our built environment. As a responsible design and build organization, we are committed to integrating biodiversity protection and enhancement into every phase of our projects.

Our Commitment Includes following:

1. Ecological Site Planning

- Conduct biodiversity impact assessments before site selection.
- Avoid development in ecologically sensitive or protected areas.

2. Sustainable Design and Construction

- Incorporate green infrastructure such as green roofs, native landscaping, and permeable surfaces.
- Minimize habitat disruption through low-impact construction practices.

3. Responsible Material Sourcing

- Use certified sustainable and non-endangered materials.
- Promote circular economy principles to reduce resource extraction.

4. Post-Construction Stewardship

- Restore and enhance natural habitats post-construction.
- Monitor biodiversity outcomes and engage with local conservation groups.

5. Stakeholder Engagement and Education

- Collaborate with clients, communities, and experts to promote biodiversity awareness.
- Train employees and contractors on biodiversity-friendly practices.

6. Transparency and Reporting

- Track and report biodiversity metrics as part of our ESG disclosures.
- Align with global frameworks such as the Convention on Biological Diversity (CBD) and India's National Biodiversity Action Plan.
- Biodiversity-Related Targets for Priority Areas

To work towards no net loss of biodiversity, **ANJ Turnkey Projects Private Limited** sets the following Targets

1. Ecological Site Planning

- Target: 100% of new projects undergo biodiversity impact assessments.
- Target: Avoid development in critical habitats and protected zones.

2. Sustainable Construction

- Target: Reduce construction-related habitat disruption by 50% over 5 years.

3. Material Sourcing

- Target: Source 90% of materials from certified sustainable suppliers.
- Target: Eliminate use of materials linked to endangered species.

4. Post-Construction Stewardship

- Target: Restore native vegetation in 100% of completed projects.
- Target: Establish biodiversity monitoring programs for all large-scale developments.

5. Stakeholder Engagement

- Target: Conduct biodiversity awareness sessions for all project teams regularly.
- Target: Partner with at least 3 local conservation groups by 2028.

6. Biodiversity Metrics and Reporting

- Target: Publish annual biodiversity impact reports at regular intervals.
- Target: Integrate biodiversity KPIs into ESG dashboards by 2028.
